

We are hiring:

Engineer - Metrology

see more —→

Job Description:

The Engineer will develop, manage, and maintain the Metrology Program for the Petersburg Pharmaceutical Manufacturing facility. You have a willingness to perform "hands-on" work in a dynamic, fast-paced start-up environment. Incumbent provides technical expertise on metrology and compliance standards.

Location: **Petersburg, Virginia**

see more 

Requirements:

- Create and modify calibration procedures by determining metrology requirements such as calibration test points, tolerances, etc. from manufacturer's manuals, laboratory methods, or system requirements.
- Recommend, acquire, and set up appropriate calibration standards.
- Test and measurement equipment range from general-purpose physical and dimensional equipment to custom-built sterilizer systems. Disciplines comprise Mass, Temperature, Humidity, Vacuum, Length, Optics, Pressure, Dimensional Metrology, Force, and Flow.
